Details of any collateral

1) Notes payable are secured by:

   (i) a security interest in the biodiesel plant constructed by a subsidiary - PT Ciliandra Perkasa (“PT CLP”);

   (ii) a security interest in all moveable assets of PT CLP and certain subsidiaries (collectively the “Guarantors”), including cash accounts, but excluding accounts receivable and inventories;

   (iii) a pledge by subsidiary Ciliandra Perkasa Finance Company Pte. Ltd. of its rights in the intercompany loans made with the net proceeds of the notes; and

   (iv) pledges by the shareholders of PT CLP of 100% of the share capital of PT CLP and a pledge by the Guarantors holding the shares of another subsidiary of all such shares held.

2) Bonds payable are secured by:

   (i) biological assets, land use rights and property, plant and equipment belonging to subsidiary PT Meridan Sejatisurya Plantation, amounting to Rp500,000 million.

</tbody>
</table>

1(d)(iii) To show the total number of issued shares excluding treasury shares as at the end of the current financial period and as at the end of the immediately preceding year.

The Company’s total number of issued shares excluding treasury shares as at 31 December 2009 and 31 December 2008 is 1,453,459,221.

1(d)(iv) A statement showing all sales, transfers, disposal, cancellation and/or use of treasury shares as at the end of the current financial period reported on.

There were no treasury shares which were sold, transferred, disposed, cancelled or used in the current financial period.

2. Whether the figures have been audited, or reviewed and in accordance with which auditing standard or practice.

The financial statements presented above have not been audited or reviewed by the Company’s auditors.

3. Where the figures have been audited or reviewed, the auditors’ report (including any qualifications or emphasis of matter).

Not applicable.

4. Whether the same accounting policies and methods of computation as in the issuer’s most recently audited annual financial statements have been applied.

The Group has applied the same accounting policies and methods of computation in the preparation of the financial statements as at 31 December 2008 except for the adoption of new or revised Financial Reporting Standards (FRS) and Interpretation of FRS (INT FRS) that are mandatory for the financial years beginning on or after 1 January 2009. The adoption of these FRS and INT FRS has no significant impact to the Group.
5. If there are any changes in the accounting policies and methods of computation, including any required by an accounting standard, what has changed, as well as the reasons for, and the effect of, the change

(i) Biological Asset Valuation

The Group has adopted the practice of determining the fair value of its biological assets on an annual basis, instead of semi-annual basis. Accordingly, any changes in fair value of the biological assets will be recorded in the fourth quarter of the year. The comparative figures for three months ended 31 December 2008 have been restated to conform to the current year’s practice and presentation as follows:

<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>

</tr>
</tbody>
</table>

(ii) Functional Currency and Convertible Bonds

The Group has determined that the functional currency of the Company has changed from the Singapore Dollars to the United States Dollar (“USD”) with effect from 3Q2009 and this change has been implemented prospectively. USD has become the primary currency of its funding, investments and transactions and therefore better reflects the primary economic environment of the Company.

The Group has also reassessed the accounting treatment of its US$100 million convertible bonds which were issued on 22 September 2009 and determined that the appropriate treatment is to account for them as separate liability component and equity components, instead of as separate liability and embedded derivative components.

The comparative figures for nine months ended 30 September 2009 have been restated as follows:

6. Earnings Per Ordinary Share (EPS) of the group for the current financial period reported on and the corresponding period of the immediately preceding financial year, after deducting any provision for preference dividends

Basic earnings per share amounts are calculated by dividing earnings for the corresponding periods attributable to the equity holders of the parent by the weighted average number of ordinary shares outstanding at the end of the respective financial period. Diluted earnings per share is calculated on the same basis as the basic earnings per share except that the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential ordinary shares.

As the share price of the Company was below the conversion price of the Convertible Bonds at the end of the financial period, there were therefore no dilutive potential ordinary shares as at the end of the financial period.

8. **A review of the performance of the group, to the extent necessary for a reasonable understanding of the group’s business.** It must include a discussion of the following:

(a) any significant factors that affected the turnover, costs, and earnings of the group for the current financial period reported on, including (where applicable) seasonal or cyclical factors; and

(b) any material factors that affected the cash flow, working capital, assets or liabilities of the group during the current financial period reported on

**REVIEW OF INCOME STATEMENT**

**Sales**

Our crude palm oil (“CPO”) sales volume increased by 7.8% and palm kernel (“PK”) sales volume by 6.4% for FY2009, in line with higher production volumes as more of our trees matured and aged into their prime producing years. This increase in sales volume helped offset the decline in average selling prices, and therefore sales fell by a smaller percentage. Sales for 4Q2009 decreased by 6.1% to Rp650.2 billion and sales for FY2009 decreased by 18.2% to Rp2,276.7 billion.

The following tables provide breakdowns of our sales, sales volume and average selling prices:

8. Review of Group Performance (continued)

Cost of Sales
Cost of sales comprises mainly harvesting costs, plantation maintenance costs, FFB purchases from plasma farmers, plantation general expenses and mill processing costs. Cost of sales decreased by 14.1% from Rp272.0 billion in 4Q2008 to Rp233.7 billion in 4Q2009. For FY2009, cost of sales was Rp919.7 billion, a 0.3% decrease over FY2008. There were decreases in the value of FFB purchases due to lower market prices of CPO as compared to FY2008. These were offset by increases in maintenance costs (due to larger mature hectarage) and harvesting costs (due to larger production volume and increase in minimum wage rate).

As FY2009 CPO sales volume increased by 7.8% over FY2008, cost of sales per ton of CPO sold has decreased in FY2009 as compared to FY2008.

Gross Profit
Gross profit decreased by 1.0% from Rp420.6 billion in 4Q2008 to Rp416.5 billion in 4Q2009. However, gross margin improved from 60.7% in 4Q2008 to 64.1% in 4Q2009. For FY2009, gross profit decreased by 27.1% to Rp1,357.0 billion and gross margin decreased to 59.6%.

Gains Arising From Changes In Fair Value Of Biological Assets
In accordance with the Group’s accounting policy, the Group performs valuation of its biological assets on a yearly basis. The fair value of biological assets is determined based on the present value of their expected net future cash flows. The expected future cash flows of the underlying plantations are determined using forecasted markets prices of the products. Any resultant gains or losses arising from changes in fair value are recognised in the income statement.

Gains arising from changes in fair value of biological assets amounted to Rp460.5 billion in 4Q2009 and in FY2009; while there was a gain recorded in 4Q2008 and FY2008 of Rp377.7 billion. The gains in 4Q2009/ FY2009 arose from assumptions of higher CPO prices, lower discount rate and new plantings carried out in FY2009.

Selling and Distribution Costs
Selling expenses, comprising mainly transportation expenses and export taxes, decreased by 80.6% from Rp18.8 billion in 4Q2008 to Rp3.6 billion in 4Q2009. This significant decrease was due to lower export taxes incurred as a result of a decrease in Indonesia’s export taxes levied on CPO in this period, due to lower average CPO price. For FY2009, selling and distribution costs amounted to Rp27.6 billion, a decrease of 83.4% over FY2008.

General and Administrative Expenses
General and administrative expenses, comprising professional fees, remuneration of office staff, licences and software fees, increased by 120.7% from Rp31.7 billion in 4Q2008 to Rp70.0 billion in 4Q2009, mainly due to increase in staff remuneration incurred and provision for FY2009 bonus made in this period. This brought FY2009 general and administrative expenses to Rp153.9 billion, a 33.1% increase over FY2008.
8. Review of Group Performance (continued)

(Losses)/Gains on Foreign Exchange

We recorded a loss of Rp14.9 billion on foreign exchange in 4Q2009, compared to a loss of Rp133.2 billion in 4Q2008. These are mainly due to translation differences on foreign denominated borrowings, and effects of IDR/USD movements on our sales and cost of goods.

For FY2009, we had a cumulative gain on foreign exchange of Rp104.2 billion compared to a cumulative loss of Rp122.7 billion in FY2008.

Net Financial Expenses

Net financial expenses comprise interest expenses (including amortization of issuance costs) after deducting interest and other financial income. Part of the interest expenses are capitalised to our immature plantations and property, plant and equipment.

The following table reflects the computation of net financial expenses:

<table>
<thead>
<tr>

<td>n.m.</td>
</tr>
</tbody>
</table>

We experienced a net financial expense of Rp61.6 billion in 4Q2009 compared to a financial income of Rp33.9 billion in 4Q2008. The higher net financial expense in 4Q2009 is attributed to additional interest expense incurred on the convertible bonds which were issued in September 2009, smaller percentage of interest capitalisation and the absence of gain on notes redemption which took place in 2008.

For FY2009, we had net financial expenses of Rp208.0 billion a 261.5% increase over FY2008 due to the same reasons above.
8. Review of Group Performance (continued)

Gains / (Losses) on Cross Currency Swap

We have entered into a cross currency swap to convert our 11.50% Rp500 billion bond (issued in November 2007) into a 7.40% US$53.4 million liability. Changes in the mark-to-market position of the swap as at the end of every balance sheet date will be booked in the income statement.

In 4Q2009, there was a gain of Rp37.8 billion due to improvements in the mark-to-market position of the swap. However, there was a mark-to-market loss of Rp129.0 billion in 4Q2008. There was a mark-to-market gain of Rp188.6 billion in FY2009 versus a mark-to-market loss of Rp176.3 billion in FY2008.

Tax Expense

Tax expense increased by 65.0% from Rp123.2 billion in 4Q2008 to Rp203.2 billion in 4Q2009. This increase was mainly due to higher taxable profit. For FY2009, tax expense decreased by 1.3% from Rp470.4 billion in FY2008 to Rp464.6 billion due to lower taxable profit.

Profit for the Year/Period

As a result of the foregoing, profit for the period increased by 30.1% from Rp415.5 billion in 4Q2008 to Rp540.8 billion in 4Q2009. For FY2009, profit increased by 7.4% from Rp1,151.6 billion in FY2008 to Rp1,236.5 billion in FY2009.

REVIEW OF BALANCE SHEET AND CASH FLOW

Total assets of the Group increased from Rp7,815.3 billion as at 31 December 2008 to Rp9,497.8 billion as at 31 December 2009. Current assets increased by Rp393.7 billion mainly as a result of a larger cash and bank balance, although this was partially offset by a decline in trade receivables and inventories. Non-current assets increased by Rp1,288.8 billion mainly from increased values of biological assets and of property, plant and equipment due to continued investments by the Group in productive assets.

Total liabilities of the Group increased by 12.6% from Rp3,484.4 billion as at 31 December 2008 to Rp3,923.3 billion as at 31 December 2009. This increase is mainly due to the issuance of convertible bonds in September 2009. This was partially offset by the decrease in the derivative financial liability balances due to improvements in the mark-to-market position of the cross currency swap.

Our total equity increased to Rp5,574.5 billion as at 31 December 2009 from Rp4,330.9 billion due to the Group’s positive performance in FY2009.

In 4Q2009, there was net cash generated from operating activities amounting to Rp115.8 billion, a decrease from Rp297.6 billion generated in 4Q2008. For FY2009, net cash generated from operating activities was Rp405.3 billion, compared to Rp1,029.0 billion in FY2008. The decrease is mainly due to lower selling prices of CPO, coupled with higher income tax payments and negative effects from foreign exchange movements.

Net cash used in investing activities decreased by 32.2%, from Rp384.9 billion in 4Q2008 to Rp261.0 billion in 4Q2009. For FY2009, the Group used Rp808.8 billion for investing activities, compared to Rp1,113.2 billion in FY2008. This decrease is mainly due to an acquisition of a group of subsidiaries in West Kalimantan that was made in FY2008.

For financing activities, there was a decrease in the net cash used in financing activities from Rp97.2 billion in 4Q2008 to Rp3.6 billion in FY2009. For FY2009, the Group generated Rp999.6 billion from financing activities, compared to utilisation of Rp231.2 billion in FY2008. The cash generation was mainly due to proceeds from the convertible bonds issuance in September 2009.

As a result of the foregoing, the Group registered an overall increase in cash and cash equivalent of Rp596.1 billion in FY2009, bringing the Group’s cash balance to Rp1,688.2 billion as at 31 December 2009.
9. Where a forecast, or a prospect statement, has been previously disclosed to shareholders, any variance between it and the actual results

Not applicable

10. A commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months

The long-term fundamentals of the palm oil industry remain favourable. In the near term, especially in 1Q2010, CPO production in Malaysia and Indonesia is expected to slow due to seasonality, allowing their inventory levels to fall. In addition, there are further uncertainties on the supply-side due to weather effects and continued replanting programmes in Malaysia. On the other hand, the impending South American soybean harvest is expected to be strong. Coupled with risks to global economic recovery and continued volatility in the financial markets, CPO prices could remain volatile in 2010.

The Group has maintained one of the most competitive cost structures in the industry through our disciplined cost management and focus on production efficiencies. We believe this low-cost structure will help to cushion the Group’s earnings and cashflows in the event of CPO price volatility. Looking ahead, with our consistent planting strategy, the Group can expect increased production volumes as more of our trees enter into their prime producing years. This, coupled with our low-cost and high-yielding operations, will continue to drive earnings and shareholder returns over the long run.

11. Dividends

(a) Current financial period reported on

Any dividend declared for the current financial period reported on?

(c) Date payable

Payment of the final dividend, if approved by the members at the Annual General Meeting to be held on 28 April 2010, will be made on 18 May 2010.
11. Dividends (continued)
   (d) Books closure date

   Notice is hereby given that the Share Transfer Books and Register of Members of the
   Company will be closed on 7 May 2010 for the preparation of dividend warrants.

   Duly completed registrable transfers received by the Company’s Share Registrar,
   Boardroom Corporate & Advisory Services Pte. Ltd., 50 Raffles Place, #32-01,
   Singapore Land Tower, Singapore 048623 up to 5.00 p.m. on 6 May 2010 will be
   registered to determine shareholders’ entitlements to the proposed final dividend.
   Members whose Securities Accounts with The Central Depository (Pte) Limited are
   credited with shares at 5.00 p.m. on 6 May 2010 will be entitled to the proposed final
   dividend.

12. If no dividend has been declared/recommended, a statement to that effect

   Not applicable.

PART II - ADDITIONAL INFORMATION REQUIRED FOR FULL YEAR ANNOUNCEMENT

13. Segmented revenue and results for business or geographical segments (of the group)
    in the form presented in the issuer’s most recently audited annual financial
    statements, with comparative information for the immediately preceding year

   Currently the Group operates in only one country and has one business segment. Hence, no
   segmental information is presented.

14. In the review of performance, the factors leading to any material changes in
    contributions to turnover and earnings by the business or geographical segments

   Not applicable.
